

ELECTRONIC WARFARE

μJAMMER

Onboard payload jammer for UAV and target drone. Its capabilities are self protection for radar based weapons, radar systems evaluation with live missiles, operator training, stand in jamming for single and swarming UAV.

The Jammer is a low weight and low cost for affordable destruction.

DEFENCE APPLICATIONS

- Self protection
- ECCM evaluation
- Radar live missile testing
- Operators training

HIGHLY RELIABLE | MODULAR | ADAPTABLE
FLEXIBLE | SCALABLE | AD-HOC SOLUTION |

Type	Electronic warfare jammer
Operational frequency	S, C, X, Ku, multiband
Remote control	Digital, PWM, serial
Weight	5Kg, including batteries
Operations	Self protection Electronic counter-countermeasures (ECCM) evaluation Radar live missile testing Operator training Stand-in jamming
